SECTION B

PATIENT OR PATIENT'S LEGAL GUARDIAN TO COMPLETE

Risks related to transfer acknowledgment:

I realize that there are risks involved in transfer from one facility to another regardless of the reason for the transfer. Such risks include those inherent in the Transfer such as traffic delays, inclement weather, accidents during transport, rough terrain or turbulence, and the limitations of equipment and personnel present in the vehicle. I also understand that my medical condition may worsen.

I understand that every effort will be made to ensure a safe transfer. However I acknowledge I have been informed of the above and agree to transfer by the mode determined by the physician:

1. Physician initiated transfer – Acceptance

I have been informed by the physician that the medical benefits of transfer outweigh the risks.

I accept those risks and consent to be transferred. I understand that a copy of my medical records and reports that are available at the time of transfer, as appropriate, will be sent to the receiving facility.

3. Patient Initiated Request.

I have been informed by the physician that based on the information available to the physician at the time of transfer. The risks of transfer outweigh the medical benefits.

I am aware that the Hospital has a legal obligation as well as the willingness, capacity and capability to provide the appropriate care for my medical condition. However, I refuse to consent to further medical treatment and request transfer to

SECTION C

REFUSAL OF RECOMMENDED TRANSPORT

MEDICAL RISKS OF REFUSING EMERGENCY TRANSPORT:

The medical risks of refusing transport as recommended have been explained to me by a member of the medical staff and I understand them to be as follows:

- ☐ Deterioration/worsening of my condition(s) ☐ Lack of life-saving equipment
☐ Additional pain or suffering ☐ Death (self or unborn fetus)
☐ Permanent disability/disfigurement/loss of limb, organ, or function
☐ Delays in getting to the other hospital or failure to arrive at the other hospital due to traffic, motor vehicle accident, or inability to drive.
☐ Other (specific to patient's emergency medical condition, e.g., heart attack, stroke, loss of oxygen, etc.):

CERTIFICATION OF REFUSAL AND RELEASE:

This is to certify that I refuse to go to the receiving hospital by the recommended transport. This is my choice and I understand this choice is against the medical advice/recommendation of the emergency physician. I accept personal responsibility for all harm or disability I may suffer from this refusal. I understand and have been advised that, if I change my mind at any time, I may inform the staff prior to departure or if after departure I may call 911, and receive transportation to a hospital. I have also been advised that I may return to the Hospital at any time for further testing or treatment. I hereby release the Hospital, its administration, personnel, and my attending physician(s) from any responsibility for consequences that may occur as a result of my refusal.

SECTION D

ADDITIONAL PHYSICIAN DOCUMENTATION
TO BE COMPLETED FOR TRANSFERS FROM THE EMERGENCY DEPARTMENT AND LABOR & DELIVERY

The patient presented to the Hospital requesting emergency medical treatment and the Hospital has provided a medical screening examination and stabilization services to the extent possible, given the Hospital's current capacity and/or capabilities. Transfer of the patient to a hospital with additional capacity and/or capabilities is medically indicated, or has been requested by the patient or the patient's legal guardian. Check only one:

- ☒ The patient is being transferred to a hospital that provides a different level of care and/or services which this hospital does not provide, for the purpose of stabilizing and/or treating the patient's Emergency Medical Condition, including psychiatric emergencies.
- ☐ The patient is being transferred, at the patient's request, following a disclosure by the Hospital of its obligations to provide Emergency Medical Screening and treatment, and after informing the patient of the risks and benefits of the Transfer.
- ☐ The patient is being transferred because of failure, refusal, or inability of an on-call physician to respond

On-Call Physician's Name Dr. Malean (Kish) McLeod Address 1613 N McKennie St Phone Number Foley Hlth 36535

PHYSICIAN CERTIFICATION

EMERGENCY MEDICINE PHYSICIAN TO COMPLETE:

The patient has an emergency medical condition that this hospital has attempted to stabilize and/or treat to the extent possible given the Hospital's capacity and capabilities. However, based on the information available to me at the time of transfer, I certify that the medical benefits expected from the provision of appropriate medical care at another facility outweigh the increased risks to the individual and, in the case of a patient in labor, to the unborn child associated with the transfer of the patient to the receiving facility. For psychiatric conditions, the patient is protected from harming him/herself or others. All transfers have the inherent risk that the patient's medical condition could worsen. There are also risks of traffic delays, accidents during transport, inclement weather, rough terrain or turbulence, and the limitations of equipment and personnel present in the vehicle. In addition, regarding this patient, additional risks and benefits include:

Expected Benefits of Transfer Neurology eval

Specific Risks of Transfer WOC, death

Transferring Physician/Qualified Medical Personnel Signature [Signature]

Physician Countersignature
(if patient was transferred pursuant to a verbal order due to urgent need to transfer)

Italic text: Indicates the sentence that has the critical care flag.

* Category names of the items used in E&M determination are for grouping purposes only and serve by proxy to indicate a level of evaluation and management for patients whose injury or illness warrant such services. They are not a comprehensive definition of any procedure of intervention. Reference: <http://www.cms.gov/quarterlyproviderupdates/downloads/cms1392fc.pdf> "Regarding principle 11 - hospitals should use their judgment to ensure that the coding guidelines can produce results that which are reproducible by others. In the absence of national visit guidelines, hospitals have the flexibility to determine whether or not to include separately payable services as a proxy to measure hospital resource use that is not associated with those separately payable services."

08/06 This 6 yrs old Male presents to ED via EMS - Ground with complaints of **Probable Seizure**. mkm
20:09
08/06 EMS care: supplemental oxygen, CPR?. 6-year-old black male without any previous medical problems mkm
20:09 presenting to Baldwin Health ER after having seizure-like activity at local water park 1 hour prior to arrival. Mom states that patient was with grandmother and that she states he had at a hot dog decided to go back and swim. Patient slid down water slide in grandmother went to go check on him called his name he was not responding so she approached him and noticed that he was shaking all over with eyes rolled in the back of his head. EMS contacted. CPR initiated? According to family members. They state that he was not breathing with shaking all over that lasted about a minute. Once EMS applied supplemental O2 and applied some chest compressions patient awoke and was only complaining of dizziness. No incontinence. No dental or lingual trauma. Patient was slightly confused but is now alert oriented to his baseline states that he's in the 1st grade goes to Mathis elementary school and wants to be a fireman. No fever chills. Patient is not on any medications. No developmental delays up-to-date on immunizations.
08/06 Upon further inquiry with the RNs in attendance patient did not have to get CPR apparently a fire EMT mkm
22:04 was on site and evaluated patient who was confused and with some low O2 sats but once oxygen applied patient improved to baseline.

Historical:

- **Allergies:** No Known Allergies;
- **Home Meds:**
 1. None
- **PMHx:** None
- **PSHx:** None

- **Social history:** : Smoking Status: patient/guardian denies using tobacco..
- **The history from nurses notes was reviewed:** and I agree with what is documented, up to this point,.

ROS:

08/06 mkm
20:13 **Cardiovascular:** Negative for chest pain, palpitations, and edema,
Respiratory: Negative for shortness of breath, cough, wheezing, and pleuritic chest pain,
Abdomen/GI: Negative for abdominal pain, nausea, vomiting, diarrhea, and constipation,

Differential diagnosis: seizure, Sepsis, fever, electrolyte disturbances.

Sepsis Evaluation: Sepsis Protocol: No, was not initiated.

Data reviewed: I reviewed the presenting history and prior records with the patient. Radiological films were independently interpreted by me and I also reviewed the results of the I ordered labs for this patient and reviewed the results. Specifically, Initial and all vital signs, nurses notes, EMS record.

Counseling: I had a detailed discussion with the patient and/or guardian regarding: the historical points, exam findings, and any diagnostic results supporting the discharge/admit/observation diagnosis, lab results, radiology results, the need to transfer to another facility, for higher level of care, due to lack of capacity or capability the transfer form was completed.
